Jiaxin Wang

E:mail: jiaxinwang1996@gmail.com

Telephone: (86) 131-3619-6599

Address: College of Mathematics and Information Engineering,
Zhejiang Normal University, Jinhua, 321004, P. R. China

EDUCATION　BACKGROUND

Software Engineering

College of Mathematics and Information Engineering, Zhejiang Normal University　　June.2018

CSC funded excellent undergraduate program

University of Wollongong, Wollongong, Australia　　July.2017-Jan.2018

General GPA: 3.75　　　　Major GPA: 3.8　　　　Ranking: 1/40

CORE COURSES

Calculus, Linear Algebra, Discrete Mathematics, Probability and Statistics,

Algorithms and Data Structures, Advanced Programming,

Big Data Analysis, Computer Vision, Computer Network, Database Application,

Game Development, NP-complete Algorithm, Introduction of Robot, etc

RESEARCH INTEREST

Computational Biology, Bioinformatics, Data Analysis, etc.

RECORDS OF STANDARD TESTS

IELTS	7 (Listening 6.5, Reading 8, Writing 6.5, Speaking 6.0)	Sept.2017
GRE	319 (Q:168,V:151,W:3.5)	Sept.2018

RESEARCH　EXPERIENCE

1.Undergraduate research assistant at Zhejiang Normal University

School project: Medical image ROI extraction　　　　September.2014-November.2015

• Participated a project that uses brain magnetic image resonance to extract medical image

• Implemented an image segmentation algorithm in MATLAB which shows Active Contour Model has better performance

School project: Image recognition based on facial expression　　　　October.2015-March.2016

• Worked on a project called image recognition based on facial expression, performed the face detection and eye localization.

Provincial Issue: Implementation of plant image searching engine based on Android platform　　　　October.2016-present

• Served as Principle Investigator sponsored by the Zhejiang Students Innovation Activity Plan

• Trained five classifications by using Tensorflow framework and developed an Android app called

Plantpano

Online Stanford Systematic Research on AI   August.2016-September.2016
- Constructed deep learning platform
- Trained and compared several CNNs performance on image classification based from ImageNet

2. Join the group in Zhejiang University

National Issue: Archeological Software Development   September.2016-July.2017
- Archeological multi-source database based on web GIS
- Visualization of multi-source data and implement
- Software registration (Second Author, 2017SR162221)

National Issue: Wavelet Noise Remove   January.2018-July.2018
- Strip noise removal for airborne radar data by using wavelet and 2D FFT filtering
- My job is the code implement
- Finished a paper for submission (Third author)

3.Visiting student at University of Wollongong

Remote Photoplethysmography   August.2017-June.2018
- Implement and improve the platform of remote photoplethysmography
- Present an efficient non-contact heart rate measurement based on CIELab color space
- Publish a paper on BIBE2018 conference

OTHER   EXPERIENCE

Internship in Arcsoft company QA team   January.2018-June.2018
Work on alive detection project for mobile application
Team leader of Mathematical Modeling Contest   September.2014-July.2017
Information Engineering Department, Zhejiang Normal University
Teaching Assistant   September.2015-November.2015
Information Engineering Department, Zhejiang Normal University
Secretary of the Students Union   October.2014-June.2015
College of Mathematics and Information Engineering, Zhejiang Normal University
Tutor for Informatics Olympiad Contest   October.2015-March.2016
Jinhua, Zhejiang
Anniversary volunteers   September.2017
Zhejiang Normal University

PUBLICATIONS

Software Registration
1. Software copyright of Plant recognition platform, **PlantPano**, 2017SR243553, April.2017
2. Software copyright of Visualization platform for archaeological geophysical data, 2017SR162221, Feb.2017

Paper

1. **Jiaxin Wang**, Philip O. Ogunbona, Jianmin Han, Bangbing Wang, An efficient non-contact heart rate measurement based on CIELab color space.// IEEE: International Conference on Biological Information and Biomedical Engineering. Shanghai, China, 2018, pp. 1-4.

2. Bangbing Wang, Bo Sun, **Jiaxin Wang**, Jamin Greenbaum, Jingxue Guo, Laura Lindzey, Xiangbin Cui, Duncan A. Young, Donald D. Blankenship, Martin J. Siegert, Removal of 'strip noise' in airborne radio-echo sounding data using combined wavelet and 2D FFT filtering,(submitted)

AWARDS

Excellent Graduate of Zhejiang Province	June 2018
Government Scholarship, Zhejiang Province	2015-2017
Honorable Mention in COMAP's Mathematical Contest in Modeling (MCM)	March.2016
Mathematical Contest in Modeling Third provincial-level	Sept.2016
2016 Certificate Authority Cup Internet challenge round Meritorious	April.2016
2015 Certificate Authority Cup MATHEMATICAL CONTEST Meritorious	Nov.2015

SKILLS

- Proficient programming skills and experience (C++, Java, Python, Matlab/R)
- Experienced in data analysis and image processing
- Strong logical and analytical approach to problem solving
- Well in Linear Algebra, Discrete, and Mathematical analytical knowledge
- Knowing about biomedical related area
